

Suleman Luswala

Data Analyst

Bangalore, India | +91 93135 40779 | sulemanluswala3@gmail.com | LinkedIn

Profile Summary

Computer Science graduate with 6 months of hands-on Data Science internship experience and practical experience developing machine learning projects, including sign language detection and crime analysis. Proficient in Python, SQL, R, Scikit-learn, Pandas, NumPy, and Power BI, with experience in data cleaning, EDA, feature engineering, predictive modeling, and data visualization. Skilled at transforming complex datasets into actionable insights, building data-driven solutions to solve real-world problems, and creating impactful reporting and data storytelling. Experienced in ETL processes, KPI definition, and data modeling, leveraging tools like Tableau, MySQL, and PostgreSQL for comprehensive data analysis.

Technical Skills

Programming Languages: Python, SQL, R

Frameworks & Libraries: Pandas, NumPy, Scikit-learn, OpenCV, MediaPipe

Databases: MySQL, PostgreSQL

Machine Learning & AI: Predictive Modeling, Feature Engineering, Model Evaluation, Computer Vision

Data & Visualization Tools: Power BI, Matplotlib, Seaborn, Excel, Tableau, Google Analytics, Data Cleaning, EDA, Statistical Analysis, Data Modeling, ETL, KPI, Reporting, Storytelling, Pivot, VLOOKUP, Power Query

Tools & Platforms: Jupyter Notebook, Google Colab, Git, GitHub

Experience

Alliance University — Bangalore, India

Jun 2025 - Nov 2025

Data Science Intern

- Developed and evaluated machine learning models using Scikit-learn and OpenCV for automated image-based turmeric quality classification.
- Processed and prepared image datasets using Python, Pandas, and NumPy, including data cleaning, preprocessing, and feature extraction.
- Built interactive Power BI dashboards to visualize turmeric grading metrics and present data-driven insights for quality assessment.
- Applied data analytics and machine learning techniques to support an automated turmeric grading workflow, collaborating with faculty throughout model development and evaluation.

Projects

Sign Language Detection Using Augmented Reality | Python, OpenCV, MediaPipe, Computer Vision, AR

Aug 2024 - Oct 2024

- Developed a real-time hand gesture recognition system using Python, OpenCV, and MediaPipe for sign language detection.
- Implemented image processing and hand landmark detection to identify and classify hand gestures.
- Integrated augmented reality overlays to provide real-time visual feedback for detected gestures.

Crime Rate Analysis: Law, Order, and Safe Cities | Python, Pandas, NumPy, SQL, Power BI, Predictive Analytics

Oct 2023 - Dec 2023

- Analyzed crime datasets using Python to identify patterns, trends, and factors associated with urban crime.
- Performed data cleaning, exploratory data analysis, and visualization to derive insights from crime statistics.
- Developed predictive models to analyze and forecast crime trends and proposed data-driven approaches for improving urban safety.

Education

Alliance School of Advanced Computing, Alliance University — Central Campus

Aug 2022 - May 2026

Bachelor of Technology (B.Tech) CGPA: 8.0 / 10

Certifications

- Microsoft Azure Developer Associate (AZ-204) Exam Prep — Coursera
- Introduction to Operating Systems Specialization — Coursera
- Angular Developer Program — Infosys
- Networking Essentials — Cisco Networking Academy
- Introduction to Packet Tracer (Simulator for Labs) — Cisco Networking Academy

Achievements

- Participated in a university hackathon, collaborating with a team to develop an AI and data science solution, demonstrating problem-solving skills.
- Organized and coordinated technical events and workshops focused on Data Science and AI, promoting peer engagement and knowledge sharing.
- Engaged in university technical events centered on AI, data analytics, and emerging technologies.

Leadership & Activities

- Event Coordination:** Organized and coordinated technical events and workshops focused on Data Science and AI, promoting peer engagement and knowledge sharing.
